DETAILED ACTION

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Drawings

2. The drawings were received on May 31, 2007. These drawings are acceptable.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-20 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Ishii (5,339,356; cited and applied for the first time).

The claimed invention reads on Ishii as follows. The claimed virtual number reads on the private office number; the claimed first intermediate point reads on the PBX 1-1; the claimed originating point reads on extension 4-1; the claimed physical number reads on the subscriber number; the claimed second intermediate point based on the at least one physical number reads on the PBX 1-2; the claimed destination point reads on the extension 4-2; and the claimed routing table reads on the NUMBER CONVERSION TABLE 171 in FIG. 4. The entire patent to Ishii is directed to teaching converting the virtual number (private office number) into at least one physical number (subscriber number); and the proximity of any PBX to any of its extensions is an inherent relationship.

Response to Arguments

5. Applicant's arguments with respect to claims 1-20 have been considered but are moot in view of the new ground(s) of rejection.
